SKILLS

AI & Tooling

Claude Code, Git, Docker, Playwright, LLM & APIs

Web & Backend

Node.js, TypeScript, JavaScript, React/Next.js, Java, Spring Boot, SQL/PostgreSQL, HTML/CSS, MongoDB, design systems

CS Concepts

Algorithms, Distributed Systems, OOP, REST APIs, SCRUM, GDPR-compliant architecture

LANGUAGES

Norwegian	Native
English	Fluent

INTERESTS

Faith & community
Brazilian jiu-jitsu
Freediving
Hiking & fishing

Julian Hjartholm Bosdal

COMPUTER ENGINEERING STUDENT

Computer engineering student at HVL (graduating 2027) with machine learning and deep learning coursework. Developer intern at Sparebanken Norge, working between designers and developers on the bank's design system. Co-founded an aquaculture AI startup and built an LLM-based voice-to-report tool. Seeking a consultant role in software and applied AI in Bergen from 2027.

Education

Bachelor in Computer Engineering

Aug 2024 - Jul 2027 (expected)

HVL · Western Norway University of Applied Sciences

- Grade average: 4.42 / 5.0
- Coursework in ML/AI: machine learning (DAT158) and deep learning (DAT255)
- Core CS: distributed systems, algorithms & data structures, databases

FutureMakers Bootcamp, HVL & University of Cape Town

Oct 2026

Upcoming · Two-week entrepreneurship bootcamp · Cape Town, South Africa

Selected through application and interview for an intensive bootcamp at UCT, working in cross-cultural venture teams on real-world challenges.

Experience

Developer Intern, Sparebanken Norge

Sep 2026 - Dec 2026

Internship · Team Webplattform

- Part of the team behind Splash, the component library that keeps the bank's website and app visually consistent.
- Helped build a visual discovery page, so designers can browse components instead of scrolling long lists by name.
- Working on templates for common component sets and a Figma-to-code flow using only Splash components, to shorten the path from idea to prototype.
- Acting as a link between designers and developers.

Team Leader, Salt Bergen (Church)

Mar 2026 - Present

Volunteer

Leading a team of 24 with full responsibility every third weekend; coordinating preparations, welcoming guests, and delegating tasks.

Volunteer Programmer, Fribyte

Aug 2024 - Aug 2025

Part-time · Student open-source organisation

Built and maintained client websites for external clients; worked with Git, Docker, and server management.

Projects

AkvaJournal, Startup

May 2026 - Aug 2026

Co-founder & technical lead · Node.js · PWA · NB-Whisper/LLM · Supabase · Railway EU

Built a voice-first PWA for hands-free field registration: Norwegian speech-to-text (NB-Whisper on Modal) with LLM structuring into Word/Excel reports, on a GDPR-compliant EU-hosted stack.

Ran customer discovery in a conservative market: shadowed fish health biologists on site and mapped the friction in their existing journal workflow. Incubated at VIS.

Poker, Group Project

Java · Spring Boot · PostgreSQL · Scrum

Built a multiplayer web app with Java backend, PostgreSQL database, and server-side rendered pages. Managed collaboration via SCRUM, Maven and Git.
