Profile

Computer engineering student at HVL, graduating in June 2027. I'm most interested in how businesses can use AI effectively and safely, without losing control of their data. I enjoy working with customers, leading teams and starting new projects. Available from summer 2027 for a role in Bergen where I help businesses adopt AI safely.

Skills

AI literacy	Use AI tools every day, including at Sparebanken Norge. Building MerTid to help small businesses use AI effectively and safely.
System architecture	Designed AkvaJournal's flow from voice recording to transcription, LLM and finished report, hosted in the EU. Courses in distributed systems and databases.
Communication	Pitched to juries and investors. Talk to customers before building anything.
Project management	Scrum in student projects. Organised student events at ROOT and Student-KRIK.
People skills	Health care work from 2021 to 2025, in elderly care and supporting people with autism and Down syndrome. Team leader for 24 volunteers at Salt Bergen.
Security awareness	Work under a bank's security requirements. GDPR and EU data storage in my own projects.
Adaptability	Switched from aquaculture at NTNU to computer engineering because I saw big changes happening in technology and wanted to be part of them.

Experience

Intern, Sparebanken Norge — Sep 2026 – Dec 2026
Work on new ideas and AI solutions in a bank with strict security requirements. Link between designers and developers.

Founder, MerTid (idea stage) — Nov 2026 – present
Startup idea for helping small businesses start using AI safely. Top 4 finalist at Haugekonferansen 2026. Five businesses in Bergen are interested in a pilot.

User research and pitch, Howl (ZERO2MVP bootcamp, University of Cape Town) — Oct 2026
Safety app for shop owners in Cape Town, built from idea to working MVP in ten days by a team of six. I interviewed shop owners and co-presented the investor pitch.

Co-founder and technical lead, AkvaJournal — May 2026 – Aug 2026
Voice app for fish health biologists to log observations hands-free. Built with NB-Whisper and an LLM, hosted in the EU. We spent time with biologists on site before building. Incubated at VIS.

Team Leader, Salt Bergen (church) — Mar 2026 – present
Responsible for a team of 24 volunteers every third weekend.

Board Member, Aid Committee, Student-KRIK Bergen — Nov 2025 – present
Fundraising and student events for KRIK's sports aid programme.

Volunteer Programmer, Fribyte — Aug 2024 – Aug 2025
Built and maintained websites for external clients.

Earlier: event organiser at ROOT (HVL), vice president of the student council at Nordhordaland FHS, health care worker in Gulen and Trondheim kommune, aquaculture technician at Mowi, warehouse operator at Eurosupply.

Education

Bachelor in Computer Engineering, HVL — Aug 2024 – Jun 2027
Grade average 4.42 / 5.0. Courses in machine learning and deep learning.

FutureMakers entrepreneurship bootcamp, HVL and University of Cape Town — Oct 2026
Selected through application and interview.

Nordhordaland Folkehøgskule — Aug 2022 – Jun 2024

Aquaculture Engineering (30 credits), NTNU — Aug 2021 – Jun 2022

Other

Languages: Norwegian (native), English (fluent)
Interests: Faith and community, Brazilian jiu-jitsu, freediving, hiking and fishing
