SKILLS

AI & Tooling

Claude Code, Git, Docker, Playwright, LLM & APIs

Web & Backend

Node.js, TypeScript, JavaScript, React/Next.js, Java, Spring Boot, SQL/PostgreSQL, HTML/CSS, MongoDB

CS Concepts

Algorithms, Distributed Systems, OOP, REST APIs, SCRUM, GDPR-compliant architecture

LANGUAGES

Norwegian	Native
English	Fluent
German	Elementary

INTERESTS

Faith & community
Brazilian jiu-jitsu
Freediving
Hiking & fishing

Julian Hjartholm Bosdal

COMPUTER ENGINEERING STUDENT

Computer engineering student at HVL specialising in machine learning. Co-founder and technical lead of an AI startup for the aquaculture industry, and incoming developer intern at Sparebanken Norge. Seeking a summer or graduate role in software development or applied AI from 2027.

Education

Bachelor in Computer Engineering

Aug 2024 - Jul 2027

HVL — Western Norway University of Applied Sciences

- Grade average: 4.42 / 5.0
- ML/AI specialisation: machine learning (DAT158) and deep learning (DAT255)
- Core CS: distributed systems, algorithms & data structures, databases

FutureMakers Bootcamp — HVL & University of Cape Town

Oct 2026

Upcoming · Two-week entrepreneurship bootcamp · Cape Town, South Africa

Selected through application and interview for an intensive bootcamp at UCT, working in cross-cultural venture teams on real-world challenges.

Projects

Akvajournal — Startup

akvajournal.no

Co-founder & technical lead · Node.js · PWA · NB-Whisper/LLM · Supabase · Railway EU

Built a voice-first PWA for hands-free field registration: Norwegian speech-to-text (NB-Whisper on Modal) with LLM structuring into Word/Excel reports, on a GDPR-compliant EU-hosted stack.

Ran customer discovery in a conservative market — shadowed fish health biologists on site and mapped the friction in their existing journal workflow; currently developing on site with a prospective customer. Incubated at VIS.

Poker — Group Project

Java · Spring Boot · PostgreSQL · Scrum

Built a multiplayer web app with Java backend, PostgreSQL database, and server-side rendered pages. Managed collaboration via SCRUM, Maven and Git.

Personal Portfolio & CV

julianbosdal.me

Next.js · TypeScript · Tailwind CSS · GitHub Pages

Personal website and CV built from scratch, then refined with AI assistance; deployed via GitHub Pages with custom domain.

Experience

Developer Intern — Sparebanken Norge

Sep 2026 - Dec 2026

Upcoming · Internship · Team Webplattform

Joining the web platform team that builds and maintains the bank's online banking solution; frontend development in a professional agile team.

Team Leader — Salt Bergen (Church)

Mar 2026 - Present

Volunteer

Leading a team of 24 with full responsibility every third weekend; coordinating preparations, welcoming guests, and delegating tasks.

Volunteer Programmer — Fribyte

Aug 2024 - Aug 2025

Part-time · Student open-source organisation

Built and maintained client websites for external clients; worked with Git, Docker, and server management.
